WHEN TO CALL 911

In a medical emergency or in doubt, call 911.

- Do not drive to the hospital if you have severe chest pain or bleeding, feel like you might faint or if your vision is impaired or have symptoms of heart attack or stroke.
- Taking an ambulance is safer, especially if you are suffering a heart attack. Ambulance personnel can provide care on the way to the hospital.
- Emergency responders are trained to stabilize patients before they get to an emergency room.

HOW DOES CARE MY WAY® WORK?

Call **844-CAREWAY (844-227-3929)** to connect by phone, or try a virtual visit by downloading our app. Via phone or video, Care My Way® lets you talk to one of Marshfield Clinic's trusted, experienced nurse practitioners. Once you explain your symptoms, our nurse practitioner determines whether your symptoms match a Care My Way® condition.

You can get a quick diagnosis and treatment for conditions that normally require an office visit, like flu, sinus infections or urinary tract infections UTI.

Care My Way® nurse practitioners can send needed prescriptions to the pharmacy of your choice.
